# Renovation • Retrofit • Replacement

Many government organizations are challenged with dated hangar door systems. Your doors are critical to your mission operation.

**K-Con, Inc. is working with Megadoor hangar doors, a division of Assa Abloy, to help.**

Megadoor is a global leader in hangar door systems. Consider repair or replacement of your worn-out door systems.

Megadoor hangar doors are:

- Dependable – will work in any condition, fulfilling the mission,
- Low maintenance,
- Space saving – optimal use of available space, the ability to accommodate shaped hangar solutions, and no need for the side storage pockets required by conventional doors, and
- Require no bottom rails

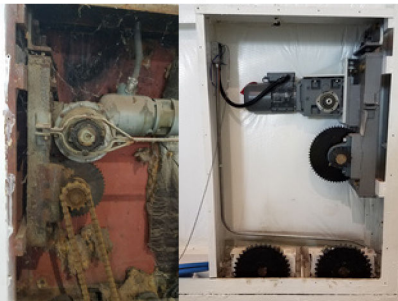

# Repair • Service • Maintenance

K-Con/Megadoor has supplied hangar door solutions to military customers around the world for the Air National Guard, Air Force and Coast Guard.

Don't wait for performance issues such as:

- Sealing capabilities
- Gear motor problems
- Chain tension loosening
- Safety edge failure
- Bottom rolling door issues

## Preventive Maintenance & Inspection

Any door: bottom rolling, vertical lift, or bi-fold doors should have a maintenance program in place.

As with any mechanical system, your hangar doors have key components that periodically need maintenance or replacement.

Changing them before they fail will save you time and money by preventing accidents and losses in productivity.

**With a maintenance program, you can ensure your hangar doors will operate smoothly and efficiently for a longer period of time.**

**K-Con, Inc. can tailor a plan to fit your specific needs based on your system components.**

If maintained regularly, you can expect your doors to work when you need them.
